

Corporate & Social Responsibility Statement

At Safety Boat Services Ltd we strongly believe in the principles of Corporate Responsibility - of achieving success in ways that honour ethical values and respect people, communities and the natural environment. Equal to protecting the health and safety of our employees, we consider environmental stewardship among our most important business responsibilities.

Actions to protect our employees and preserve the environment for those who follow are based on more than a moral impulse; initiatives such as these help ensure the short-and long-term viability of our company.

Working in harmony with the environment and supporting those in our communities that need support provides our stakeholders with a real sense of Safety Boat Services Ltd values. We operate globally in ways that honour our values and respect the people, communities, and natural environment in which we work and live. With over 20 years of operating businesses in community settings, Safety Boat Services Ltd knows the importance of backing words with responsible actions that support our stakeholders.

Daniel Ross – Director
