

SBS GUARDIAN

SBS GUARDIAN

SBS Guardian is a rugged and tough 7m Rib. Previously an RNLI lifeboat she is the perfect platform to provide safety cover up to 20nm offshore or in fast flowing rivers.

Powered by twin 75hp Yamaha outboards and with a range of approximately 100nm at full speed and the ability to work in weather most ribs would shy from you can not beat her legacy. We are also able to provide an overload tank to extend the range to almost 200nm at 30 kts or 250nm at 20 kts.

Top speed is 32 kts (37mph) and at that speed with her deep V hull she is a very stable and capable platform.

Current coding allows for 20nm during the day or 10nm at night from a safe haven which gives her the flexibility to work from various locations around the coastline or inland waterways.

With a road trailer and 4x4 there are not many places we can not launch the boat, fitted with VHF, Electronic Navigation, and soon to be fitted with AIS this boat continues its pedigree of being a "Go anywhere, do anything" boat.

PRINCIPAL SPECIFICATIONS

Length (LOA)	7.21 Metres
Breadth	2.49 Metres
Draught	0.81 Metres
Propulsion	2 x 75hp Yamaha Outboards
Speed	32kts max, Cruise 20kts
Crew	2 Crew plus one spare seat for observer / 3rd crewman
Fuel	190 L

EQUIPMENT

1 x Fixed DSC VHF
1 x Electronic Chart Plotter
1 x Hand held VHF
Future fit
1 x Class B AIS
1 x 2kw Radar
